Volume 57 Number 1

AUTHORS		REVIEW PAPER
L Hultman	1	Thermal stability of nitride thin films
		ARTICLES
M A M Seyam and A Elfalaky	31	Structural and electrical properties of HgTe thin films
F-U-Z Chowdhury, A B M O Islam and A H Bhuiyan	43	Chemical analysis of the plasma-polymerized diphenyl thin films
P Jayavel, J Kumar, K Santhakumar, P Magudapathy and K G M Nair	51	Investigations on the effect of alpha particle irradiation-induced defects near Pd/n-GaAs interface
Leszek Michalak and Andrzej Pelc	61	Homologous micro-clusters of carbon disulphide
M A Vasylyev, A G Blaschuk, N S Mashovets and N Yu Vilkova	71	LEED study of Ni (100) and (111) surface damage caused by Ar^+ ion bombardment with low energy and small doses
Rafael Garcia-Molina, Santiago Heredia-Avalos and Isabel Abril	81	Phosphorus concentration profile in silicon produced by means of the nuclear reaction $^{30}Si(p, \gamma)^{31}P$
Helin Wei, Zuli Liu and Kailun Yao	87	The influence of the incidence energy of deposited particles on the growth morphology of thin films
A Grzeszczak, S Kaszczyszyn and S Klein	99	Flicker noise of the channel electron multiplier
W Steckelmacher	105	BOOK REVIEW
	107	ERRATUM

Volume 57 Number 2

AUTHORS		ARTICLES
J Szuber	109	Preface
Theoretical studies of semiconductor surface passivation		
B Adamowicz and H Hasegawa	111	Computer analysis of photon-induced non-equilibrium phenomena at Si and AlGaAs surfaces
G P Srivastava	121	Theoretical modelling of semiconductor surfaces and interfaces

Sulfide passivation of semiconductor surfaces and interfaces

G J Hughes, P Ryan, P Quinn and A A Cafolla 131 The deposition of transition metal layers on sulphur-terminated InP(100) surfaces studies by core level photoemission spectroscopy

D R T Zahn, T U Kampen, S Hohenecker and W Braun 139 GaAs surface passivation by ultra-high vacuum deposition of chalcogen atoms

Zhang Xinyi, Zhang Fapei, Lu Erdong and Xu Pengshou 145 A novel sulfur-passivation method and magnetic overlayers on passivated III–V semiconductor surface

S Kochowski, B Paszkiewicz and R Paszkiewicz 157 Some effects of $(NH_4)_2 S_x$ treatment of n-GaAs surface on electrical characteristics of metal-SiO_2–GaAs structures

T V L'vova, I V Sedova, V P Ulin, S V Sorokin, V A Solov'ev, A A Sitnikova, V L Berkovits and S V Ivanov 163 Molecular-beam epitaxy of ZnSe-based heterostructures on $Na_2 S$-passivated GaAs substrates

E Papis, A Piotrowska, E Kamińska, K Gołaszewska, W Jung, J Kątcki, A Kudła, M Piskorski, T T Piotrowski and J Adamczewska 171 Sulfide treatment of GaSb surface: influence on the LPE growth of InGaAsSb/AlGaAsSb heterostructures

Experimental studies of semiconductor surface passivation

H L Hartnagel and C I Lin 179 Passivation of compound-semiconductor surfaces for low-noise terahertz devices

G Bruno, P Capezzuto and M Losurdo 189 Real-time spectroscopic ellipsometry for III-V surface modifications. Hydrogen passivation, oxidation and nitridation by plasma processing

V L Berkovits, T V L'vova and V P Ulin 201 Chemical nitridation of GaAs(100) by hydrazine-sulfide water solutions

J Szuber 209 New procedure for determination of the interface Fermi level position for atomic hydrogen cleaned GaAs(100) surface using photoemission

Experimental studies of semiconductor-interface formation

B Akkal, Z Benamara, B Gruzza and L Bideux 219 Characterization of interface states at Au/InSb/InP(100) Schottky barrier diodes as a function of frequency

P Mazurek, A Daniluk, K Paprocki 229 Analysis of RHEED intensities during formations of the CaF_2/Si(111) and MgO/YSi_{2-x}/Si(100) interface

M Nowak and B Solecka 237 Application of high-frequency contactless method of PEM investigations to examine near-surface layer of Si and GaAs

Volume 57 Number 3

AUTHORS ARTICLES

A A Aliev, M K Ruzibaeva and A E Kim 243 The comparative investigation of spectra of characteristic energy losses of electrons reflected from the surface of semiconductors and their alloys

A K Ray, O Omar, C S Bradley, N A Bell, D J Simmonds, S C Thorpe and R A Broughton 253 Langmuir–Blodgett film forming properties of substituted TCNQ molecules

R Hrach, D Novotný, S Novák and J Pavlík	**259**	Morphological analysis of continuous metal films
N V Egorov and E M Vinogradova	**267**	Mathematical model of electron gun on the field emission electron cathode basis
R. Kauert, St Wilfert, Chr Edelmann	**283**	Bayard–Alpert gauge with additional ion collector for pressure measurements from 10^{-9}–10^{1} mbar
M Jenko, B Koroušić, D Mandrino and V Prešern	**295**	HRAES study of oxide scale formation by decarburization of non-oriented electrical steel sheets
M Fadel, K Sedeek and N A Hegab	**307**	Effect of Sn content on the electrical and optical properties of $Ge_{1-x}Sn_xSe_3$ glasses
J P Singh, A Tripathi and D Kanjilal	**319**	In situ STM studies of HOPG surface after 200 MeV Au^{+13} ion irradiation

Volume 57 Number 4

AUTHORS		ARTICLES
M K Lei, J D Chen, Y Wang and Z L Zhang	**327**	Plasma source low-energy ion-enhanced deposition of thin films
E-Abd El-Wahabb	**339**	Electrical and optical properties of $Sb_{31}Se_{36}Ag_{33}$
V J Law, A J Kenyon, N F Thornhill, V Srigengan and I Batty	**351**	Remote-coupled sensing of plasma harmonics and process end-point detection
E Abd El-Wahabb, M M Abd El-Aziz and M Fadel	**365**	Some physical properties of thin films containing Se–Ge–Tl
S Ghosh, D K Avasthi, P Shah, V Ganesan, A Gupta, D Sarangi, R Bhattacharya and W Assmann	**377**	Deposition of thin films of different oxides of copper by RF reactive sputtering and their characterization
M Walker, K -M Baumgärtner, J Feichtinger, M Kaiser, A Schulz and E Räuchle	**387**	Silicon oxide films from the Plasmodul
G Carter	**399**	The deduction of desorption parameters using an exponential tempering function
A Fleszar, J Mizera, R Y Fillit and T Wierzchoń	**405**	The influence of the residual stresses on the corrosion and wear resistance of nitrided layers produced isothermally and cyclically on Ti–1Al–1Mn titanium alloy under glow discharge conditions
T M Berlicki	**413**	Convection–conductive vacuum sensor
